## Our first Newsletter....

Dear Valued Customer:

I am happy to share our very first Spray & Forget newsletter with you! Our goal is to have a Spring and Fall newsletter containing valuable information such as helpful cleaning tips, new cleaning applications to beautify your home and answers to frequently asked questions as well as customer success stories and useful web links. We are now in our 5<sup>th</sup> year of business at Spray & Forget and we owe that success to you. We will continue to do our best to provide you with not just products that are eco-friendly, safe, easy to use and highly effective but also with valuable information that will hopefully make your lives easier and add value and beauty to your home!

## Fall cleaning tips for a beautiful home

***Now is the perfect time to apply Spray & Forget to your roof, siding, stucco, brick or patio!*** Spray & Forget does not require pressure washing or brushing and works with the elements to remove biological stains over a 3-6 month period. Therefore, applying now before that first cold front will result in a sparkling, new looking home by the time Spring comes around. A beautiful home just in time for the fun and sun...

### ***Fall is also an excellent time to apply preventive measures to your home***

To keep those ugly biological stains off for good, apply Spray & Forget to clean stucco, siding and brick every 12 months and to clean roofs every 24 months to keep the stains off for good!

### ***Don't forget to prune trees and shrubs and apply a Winter fertilizer to your lawn.***

I prefer the organic fertilizers but you can use whatever you prefer as long as it is a Winter formula. For more Winter landscaping tips visit <http://www.trugreen.com/tg/resourcecenter/treesAndShrubs/winter.dsp>

## New Product

We are excited to announce that our new Super Concentrate with built in hose end sprayer is now available in stores and on our web site! You have all been asking for a product that will make Spray & Forget easier to apply and this is it! The sprayer connects to an ordinary garden hose and can spray up to 20 Feet at the normal 40-60 PSI of most homes. Mixing is automatic so applying Spray & Forget has never been so easy! Each unit covers up to 600 Square Feet of roof.
